Allowable Subject Matter

3. Claims 10, 12-19 and 21-33 are allowed.

As per claims 10, 12-19 and 21-33, specifically independent claims 10, 19, 24, 27, 30, 31, 32 and 33, the prior art of record fails to teach a reservation system for allowing multiple persons at an entertainment area, in other words, a theme or

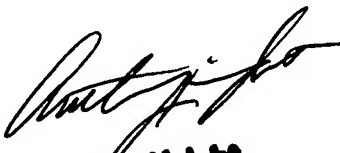

amusement park, to schedule a time in which they may evacuate from a location within the park utilizing a reservation system, wherein the persons communicate wirelessly with a central computer which allocates available times to the persons. The central computer determines available departure times and relays this information back to the persons so that the persons will know when they can depart from the park, the departure occurring in response to a disaster or crisis occurring at a disaster area at the park's location, in combination with the other claimed features and or limitations as claimed by the claimed invention.
